*\* Reactivation Letter – Active Perio Therapy*

August 14, 2002

Amy Holly  
10 Tucker Town Road  
Tucker Town, CA 12346

Dear Amy,

It has been \_\_\_\_ months since we met to review your periodontal condition and the prescribed treatment. As of today, we have not heard from you about your decision to begin treatment. Our goal is to help you restore your oral health and keep your natural teeth for a lifetime.

Periodontal disease is a bacterial infection that left untreated will continue to damage the supporting structure of your teeth. Periodontal disease is the number one reason people lose their teeth after the age of 35. Advances in modern dentistry can help you keep this situation under control. Many patients don't realize that delays in treatment can often mean the difference between a favorable prognosis and a guarded one, or even surgery.

We respect that the decision is ultimately yours. If you have decided against treatment, or if you have decided to have your periodontal treatment performed in another office, please call to tell us. You won't offend us by either decision.

If you have decided to have your treatment completed in our office, let this letter serve as the impetus to call and make that first treatment appointment. We look forward to seeing you again very soon.

Sincerely yours,

Dr. Dentist
